Information and Accessories

Panel Construction

All of our panels have aluminum inserts for additional support, excluding post and rail. White vinyl panels have aluminum inserts in the bottom rail. Tan, adobe and all textured panels have inserts in the top *and* bottom rail.

Benefits of Vinyl

Vinyl is a great material for fencing because it requires little maintenance, does not need to be painted or stained and looks great all year long. We stock the largest vinyl inventory in the Northeast here at our facility, which allows for fast turn around times and reduced lead times. Since we fabricate our own vinyl we can make custom sizes, heights and designs.

Pool Codes

Custom heights can be made to most styles of fence to accommodate for your town's pool codes. Please ask if you would like a certain style for your pool needs.
